

Product Code: 8355 Sector: Motorsport Issue No: 2 Issue Date: 01/01/22

MOTORSPORT CLASSIC HIGH PERFORMANCE 20w50

Competition classic racing NANODRIVE triple ester engine oil

Application

Ideally suited to Aston Martin, Jaguar, Ferrari, Lotus and similar vehicles with high specific output engines, yet suitable for all discerning owners who want the best possible oil for their classic race engine. Suitable for all classic motorsport including circuit racing, sprints, hill climbing, drag racing, rallying.

Ideal for large capacity V8 engines in all forms of motorsport.

Typical Characteristics

Density @ 15°C, g/ml	0.895
Kinematic Viscosity @ 100°C, cSt	19.6
Flashpoint °C	>230

What is NANODRIVE?

NANODRIVE is the award-winning Millers Oils motorsport brand that incorporates advanced nanoparticle technology for high performance applications, where stress on components is at its limit.

How does it work?

In engine oils, NANODRIVE technology combines advanced nanoparticles with triple ester chemistry to greatly reduce friction, protect against wear and maximise power.

Features and Benefits

- High performance competition fully synthetic engine oil combines the highest quality and the latest performance additives uniquely engineered for classic performance racing.
- Includes the award winning NANODRIVE technology to greatly reduce friction, protect against wear and maximise power.
- Fully synthetic engine oil specially designed for classic engines and is compatible with older seal types and technology which maintains oil pressure and reduces oil consumption.
- Our latest additive package technology incorporates high levels of ZDDP* additive for optimum wear protection.
